The high-performance UHF Gen 2 RFID tag provides incomparable precision for the tracking of smaller high-value asset such as electronic devices, communications and network cards or servers.

The Prox is a compact high-performance UHF Gen 2 RFID tag. The manageable read range of this small form tag is greater than 1.5 metres. The interference from metals and liquids causing traditional RFID tags to degrade in performance is overcome by this short-range passive RFID tag due to the use of breakthrough technology. This tag is especially suitable for supply chain solutions and achieves 99.99% accurate read rates on, off, or near metals and liquids. Prox provides incomparable precision for the tracking of smaller high-value assets such as electronic devices, communications/ network cards, or servers.

Barcode printing or other readable information is available.
Applications

- IT asset identification
- Product tracking during manufacturing
- Tool tracking
- Asset rentals

Features

- Robust, balanced performance on, off, or near metals and liquids
- Fast read speeds and reliable read rates of over 99.99%
- Excellent price-to–performance ratio
- Supplied with label finish or optional ruggedized case finish
- Increased visibility of assets/conveyance
- Improved efficiency for locating or auditing items
- 240bit EPC global Class1 Gen 2 compliant silicon
- Minimal support requirements
