

Overview

This low frequency handheld RFID animal reader terminal provides a low cost contactless system for animal identification and management. It features high performance, a user-friendly sleek design and is well suited for stock breeding, animal control or foodstuff tracking systems. The fully automatic operation as well as the USB keyboard emulation feature make it easy to use and enable any professional veterinarian and non-professional alike to use it to read the electronic data on any pet equipped with an electronic RFID chip. The low frequency RFID livestock reader is compliant with ISO11784/11785 FDX-B standard and is able to read tags from a distance of up to 130 mm.

Technical Specifications

Frequency	134.2 kHz
Protocol format	FDX-B
Standard	ISO11784/11785
Reading distance	Up to 130mm (30 mm Electronic ear tag) Up to 75 mm (2.12 mm × 12 mm Glass tube)
Interface	USB, Keyboard Emulation
Indicator	Built-in Buzzer and 24*7 OLED Display
Power supply	Rechargeable Lithium Battery
Dimensions	80 mm × 50 mm × 15mm
Weight	48g
