

**Overview**

This low frequency handheld RFID animal reader terminal provides a low cost contactless system for animal identification and management. It features high performance, a user-friendly sleek design and is well suited for stock breeding, animal control or foodstuff tracking systems. The automatic operation as well as the USB communication capabilities make it easy to use and enable any professional veterinarian and non-professional alike to use it to read the electronic data on any pet equipped with an electronic RFID chip. The low frequency RFID livestock reader is compliant with ISO11784/11785 FDX-B standard and is able to read tags from a distance of up to 200 mm.

**Technical Specifications**

- Frequency        134.2 kHz
- Protocol format  FDX-B
- Standard         ISO11784/11785
- Reading distance Up to 200mm
- Interface         USB
- Data Storage     1000 records
- Indicator         Built-in Buzzer and 128\* 640 LED Display
- Power supply     Rechargeable Lithium Battery
- Dimensions      25\*12.6\*3.1cm
