A tour of our RFID **Parking Control** solution

RFID PARKING CONTROL SYSTEM

A cost-effective and secure automated parking solution for your facility.

Parking Control—an Overview

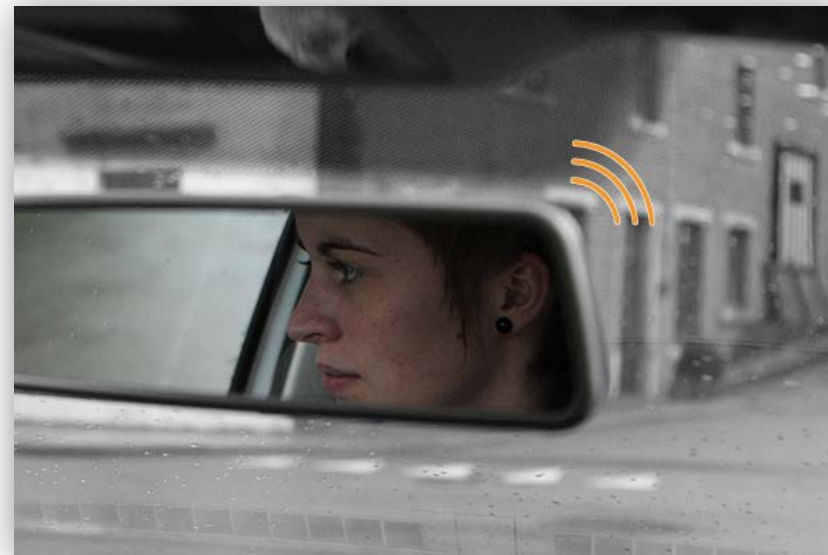

Why Parking Control?

If your business offers parking areas to employees and customers, then you will require a cost-effective and secure parking control solution for your facility. Whether it is for an office building, residential condominium, gated community, hotel, RV camp, stadium or university, an intelligent parking control system will provide efficiency, safety, and security for both your clients and their vehicles.

By using special RFID Tags programmed for different levels of access, you can control access to your parking facilities and greatly improve entry/exit speed.

In addition, access can be completely hands-free and every event is logged into a database for future security audits.

The **GAO RFID Parking Control System** provides your organization with an automated parking management solution that minimizes operating costs, and at the same time, makes your customers more satisfied with every visit.

Reduce Costs

Automated access means no more manned gates.

Ensure Safety & Security

Assign times your facility can be accessed and automatically keep track of access history to ensure a safe and secure environment.

Improve Customer Service

Increase convenience by eliminating long entry and exit queues using hands-free access to make a strong, lasting impression on your visitors.

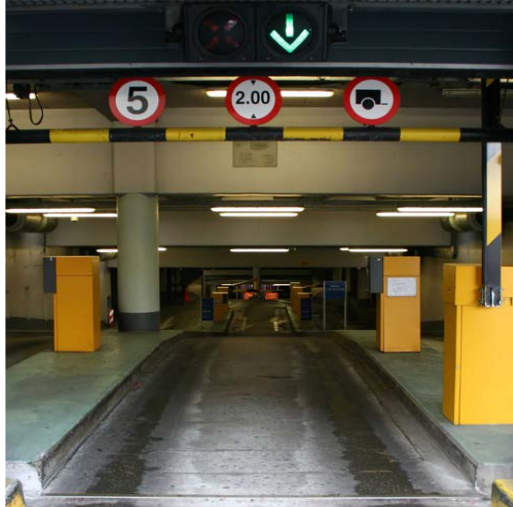

speed **"We want to see all fleet vehicles on our lot in real-time."** improve safety log
know RFID **"We want our visitors to know how many spaces are vacant."** monitor
control automate data **"We want to improve our parking operation."** identify innovate
track **"We want to control the time and date vehicles can enter our lot."** locate
access cloud **"We want to eliminate manual record keeping."** utilization long range

What's your facility's challenge? GAO RFID Parking Control can help.

How Parking Control Can Accelerate Your Organization

Drive Thru & Hands-Free Access

Eliminate entry and exit queues using a hands-free access system that does not require line of sight to identify and grant access to your users.

Tap & Go Access

Simple and cost-effective, access to parking facilities can be granted by a quick tap of an access card.

Entry/Exit Records

In addition to controlling access to your parking facility, every event is logged for future audit and review to ensure the highest level of security and loss prevention.

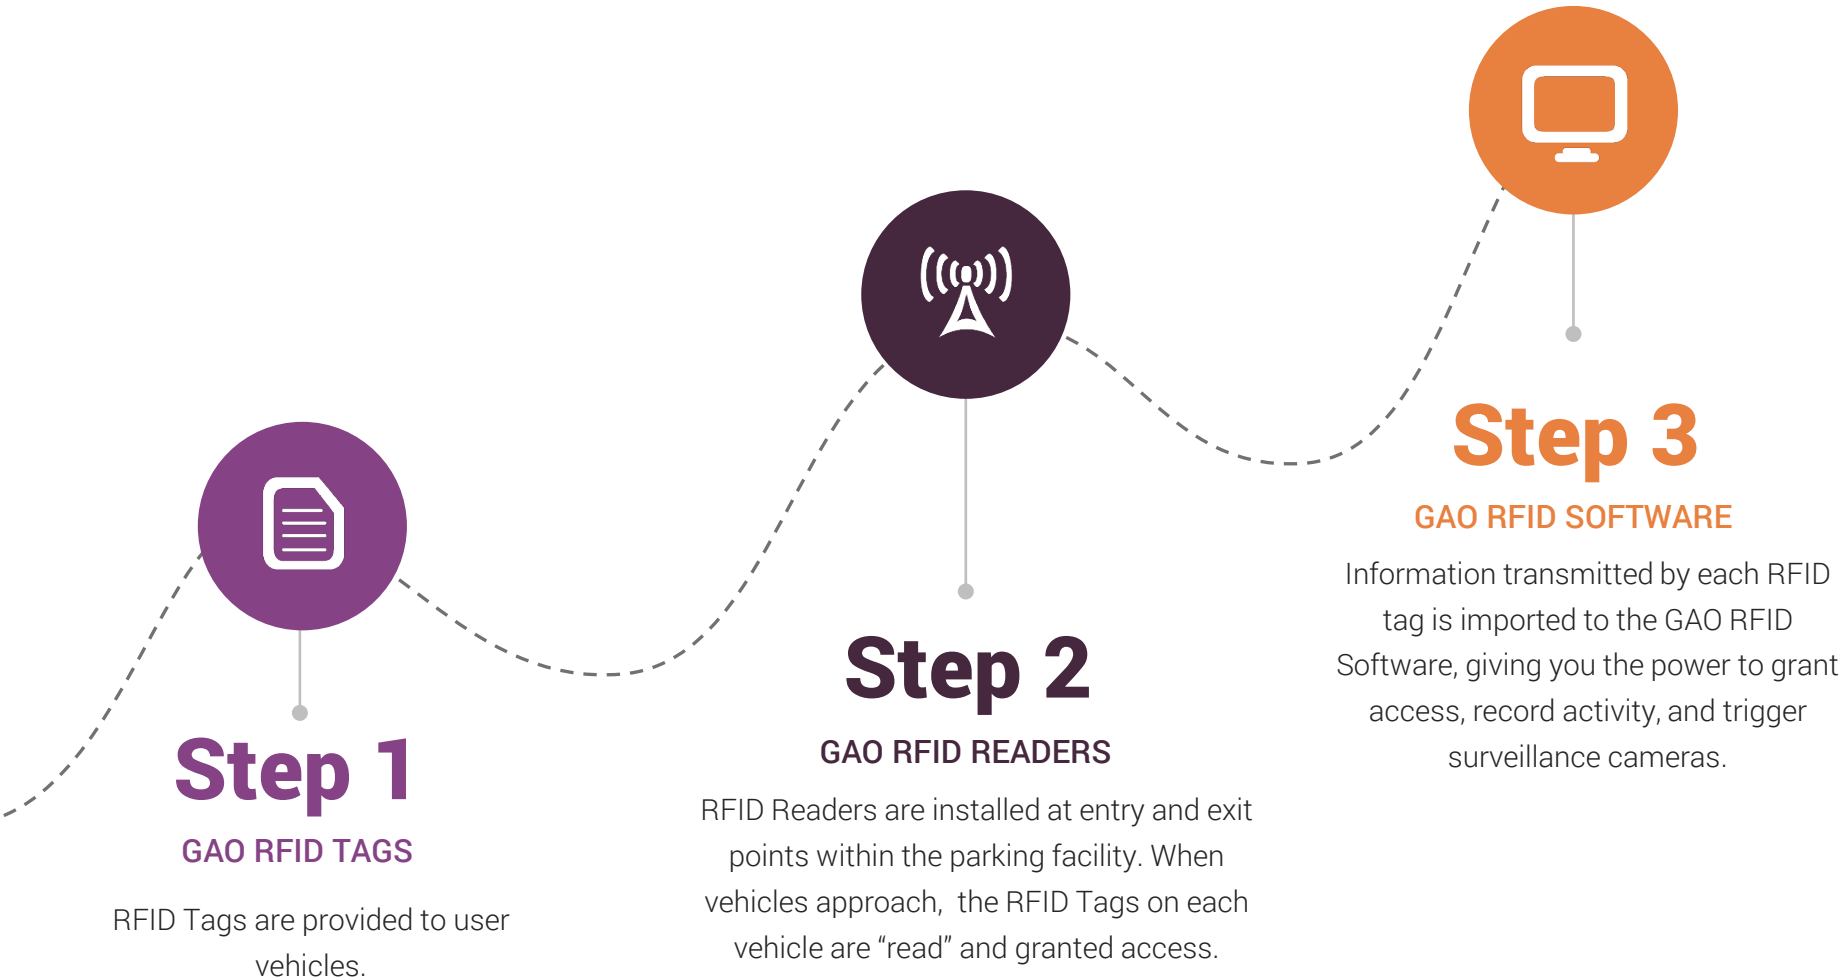

Real-Time Vacancy Info

Boost the efficiency and customer satisfaction of your facility by informing visitors in real-time how many spaces are available, and where they are located.

Intelligently identify and track vehicles within your parking facility.

Our RFID Parking Control System : 3 Easy Steps

The Result:

RFID Parking Control: Industry Solutions

Our RFID technology is being used to control parking facilities in many industries.

Fleet Management

We help businesses manage the parking solutions for their fleet vehicles, ensuring efficient and accurate control of access to parking areas.

Building Management

We empower building management to profitably collect revenue from visitors and tenants while ensuring the facility's security.

Healthcare

We ensure the efficiency of public and reserved parking areas, and provide access for courier and emergency vehicles.

Law Enforcement

We help to provide secure access to station parking garages and provide full visibility of fleet inventory in real-time.

Any type of parking facility can be automated and monitored using RFID...

Using RFID, car rental companies allow clients to return cars in any open spot and go.

Why Choose GAO RFID?
