

# RFID PARKING CONTROL

## SOFTWARE AT-A-GLANCE

*Celebrating Over 20 Years of Innovation*

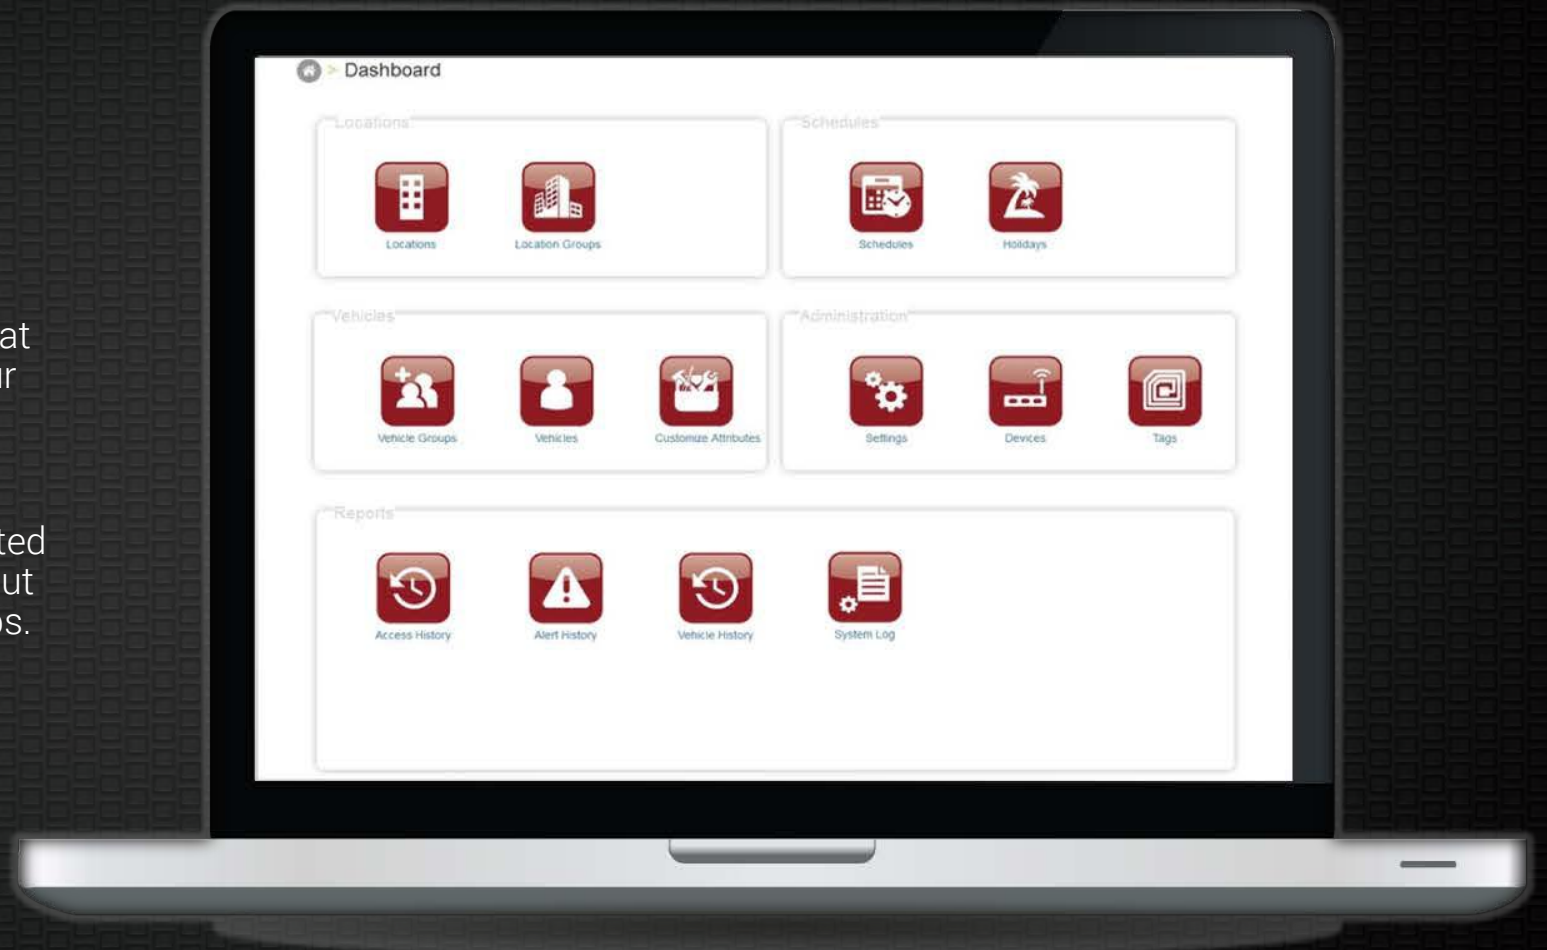

# Are you ready for total **CONTROL?**

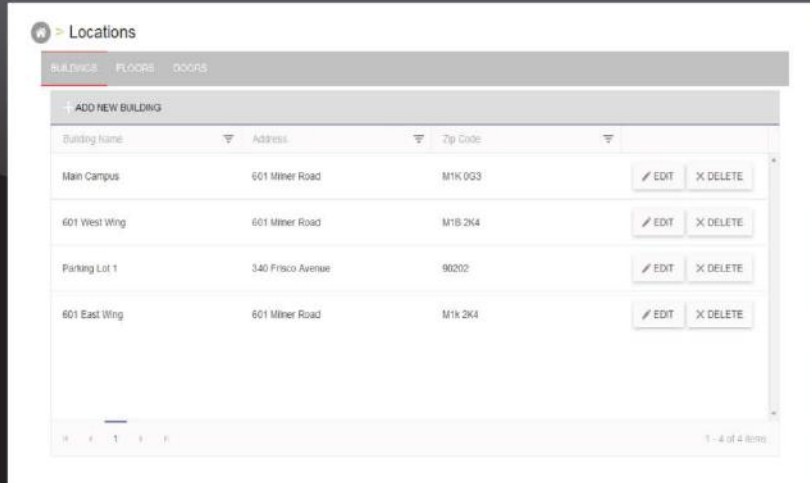

The GAO RFID Parking Control System is an automated parking management solution that minimizes operating costs while making your customers more satisfied with every visit.

Once you login to our software, you are greeted with a user-friendly dashboard designed to put the **power of parking control** at your fingertips.

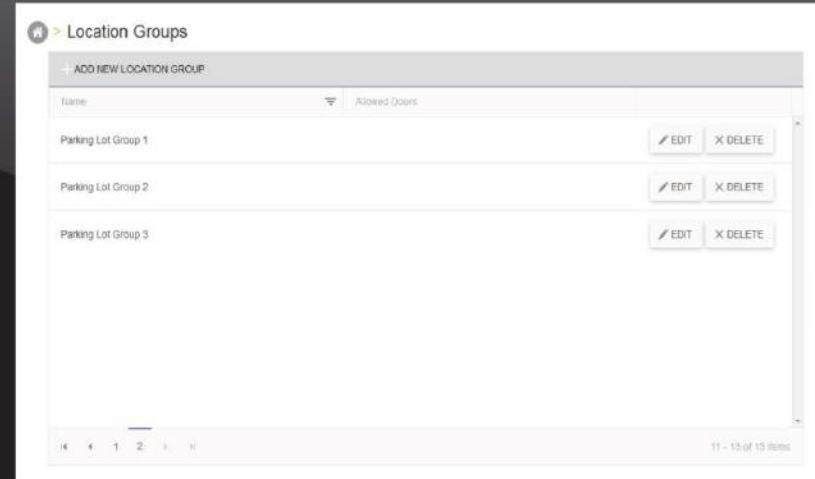

# Define your barrier gate LOCATIONS

Have the flexibility to identify each of your barrier gates and organize them as location groups. This gives you the ability to tailor access by matching barrier locations with your users' access levels.

The screenshot shows the 'Locations' management interface. It features a table with columns for 'Building Name', 'Address', and 'Zip Code'. Each row represents a location and includes 'EDIT' and 'DELETE' buttons. A red arrow points from this interface to the 'Location Groups' interface.

Building Name	Address	Zip Code	
Main Campus	601 Miner Road	M1K 0G3	[EDIT] [DELETE]
601 West Wing	601 Miner Road	M1B 2K4	[EDIT] [DELETE]
Parking Lot 1	340 Frisco Avenue	90202	[EDIT] [DELETE]
601 East Wing	601 Miner Road	M1K 2K4	[EDIT] [DELETE]

The screenshot shows the 'Location Groups' management interface. It features a list of location groups, each with 'EDIT' and 'DELETE' buttons. A red arrow points from this interface to the 'Locations' interface.

Name	Allowed Doors	
Parking Lot Group 1		[EDIT] [DELETE]
Parking Lot Group 2		[EDIT] [DELETE]
Parking Lot Group 3		[EDIT] [DELETE]

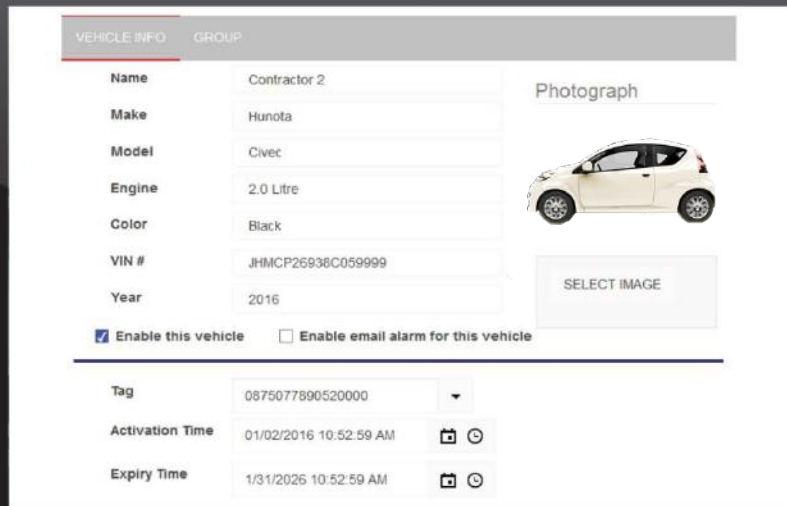

1 Assign locations to your barrier gates

2 Combine gates to create location groups

# Assign access tags to **VEHICLES**

Allocate RFID access tags to each vehicle and organize them into vehicle groups. Each group can then be configured to have access to only the entry points that you define.

**VEHICLE INFO** **GROUP**

**Name** Contractor 2

**Make** Hunota

**Model** Clivet

**Engine** 2.0 Litre

**Color** Black

**Year** 2016

**Photograph**

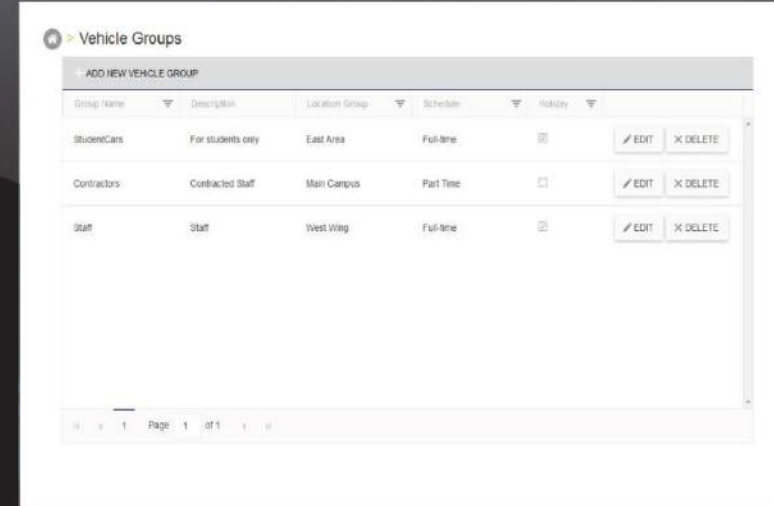

**SELECT IMAGE**

☒ Enable this vehicle ☐ Enable email alarm for this vehicle

**Tag** 0875077890520000

**Activation Time** 01/02/2016 10:52:59 AM

**Expiry Time** 1/31/2026 10:52:59 AM

**Vehicle Groups**

**ADD NEW VEHICLE GROUP**

Group Name	Description	Location Group	Schedule	Holiday	
StudentCars	For students only	East Area	Full-time	<input checked="" type="checkbox"/>	<a href="#">EDIT</a> <a href="#">DELETE</a>
Contractors	Contracted Staff	Main Campus	Part Time	<input type="checkbox"/>	<a href="#">EDIT</a> <a href="#">DELETE</a>
Staff	Staff	West Wing	Full-time	<input checked="" type="checkbox"/>	<a href="#">EDIT</a> <a href="#">DELETE</a>

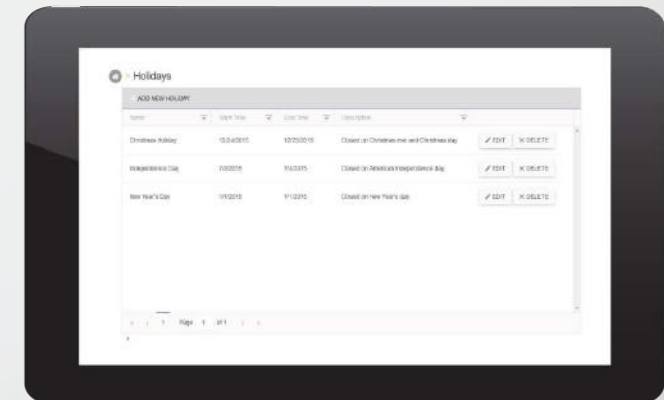

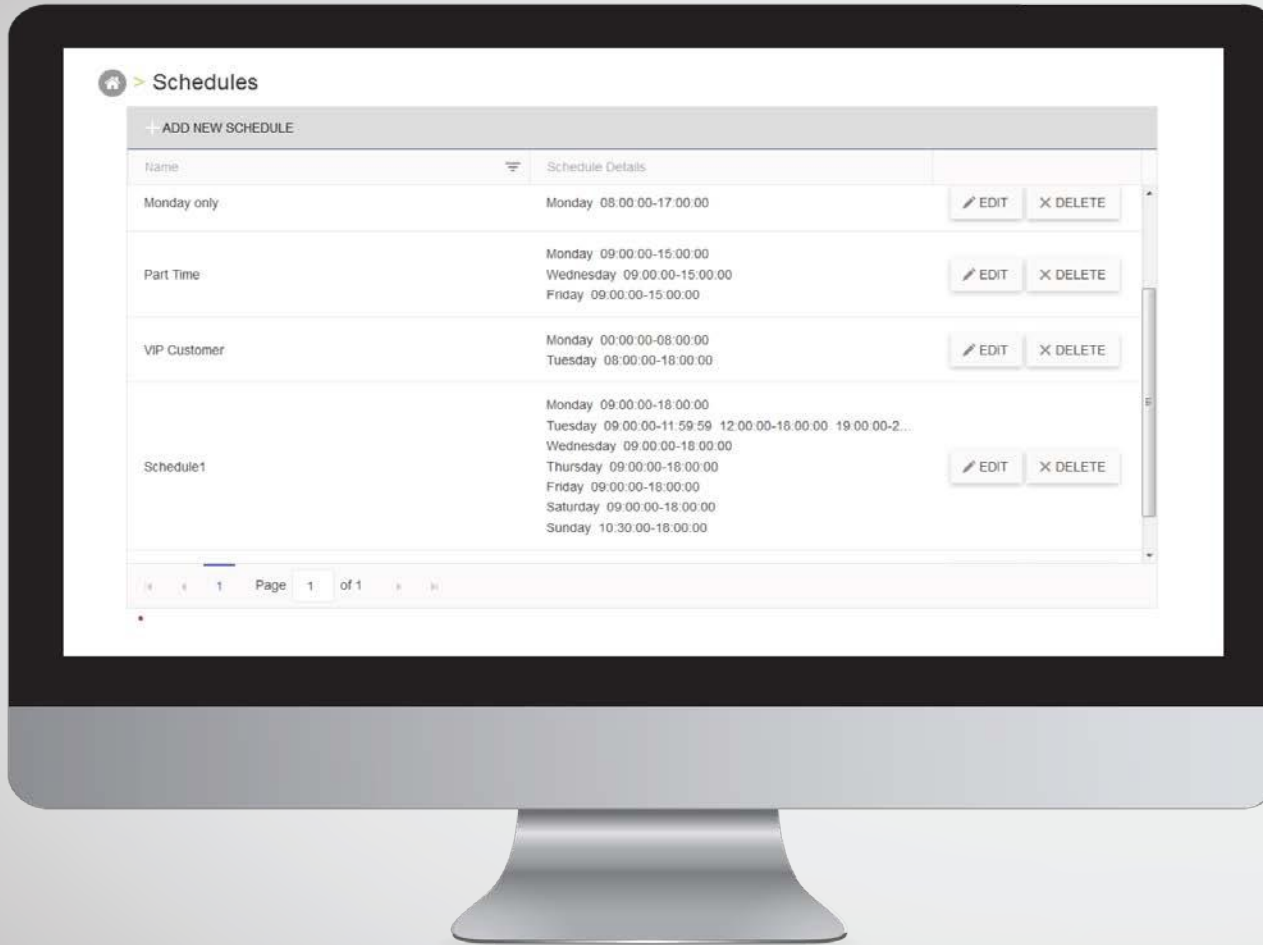

Page 1 of 1

**1** Assign access tags and enter detailed vehicle info

**2** Create different vehicle groups for different levels of access

# Have power over the **SCHEDULE**

Control when vehicle groups can access specific parking barrier locations and create multiple schedules to refine the access times to your locations for complete control.

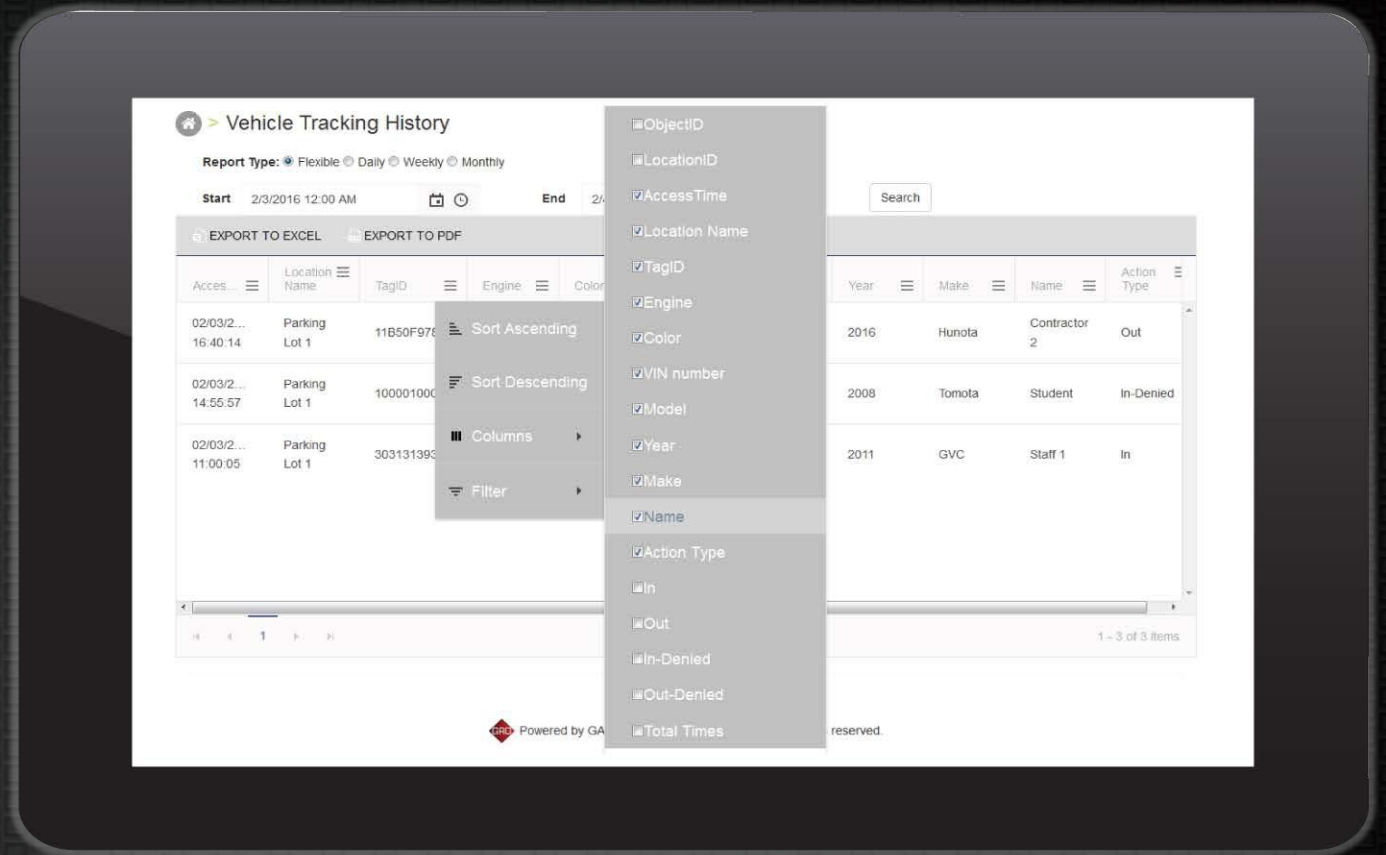

**1** Set access schedules based on vehicle group and barrier location

**2** Define holidays to restrict access on special days

# Everything you need in **REPORTS!**

Gain access to robust reports that provide important parking access data filtered by vehicle, barrier location, status, day, and more!

Made with **your needs in mind**: Every report can be emailed as an alert and exported as a CSV or PDF.

Report by Location

Report by Date

Report by Vehicle

Report by In/Out Status

# You can access it from **ANYWHERE**

Our user-intuitive software is entirely web-based. This means that as long as you have an Internet connection, you can connect into our user dashboard from any device, anywhere.

Ready to customize a **Parking Control System** for your organization?
