
TekSummit

AGENDA

For the Month of January 2026

Jointly Hosted by GAO RFID Inc., GAO Tek Inc., & GAO Research Inc., & GAO AI Incubator.

From Fear to Function: Using AI to Unlock the True Potential of IoT and Automation

Greg Jameson

AI Architect for Business Growth,
Inc. 500 Entrepreneur

Wednesday, January 21, 2026

Eastern: 1:00pm - 2:30pm

Pacific: 10:00am - 11:30am

Central European: 7:00pm -
8:30 pm

Presentation Language:
English

Target Continents: North
America, Europe, Australia,
Asia

In this thought-provoking and energizing session, AI expert and technology pioneer Greg Jameson delivers a bold message: the real challenge of AI and IoT adoption isn't the technology—it's the human response to it. Drawing on personal stories, industry shifts, and proven frameworks, Greg reframes fear of automation into a catalyst for innovation.

You'll discover how to:

- Use AI to translate IoT data into actionable business intelligence
- Multiply your team's effectiveness by combining human expertise with real-time automation
- Avoid the trap of chasing tech fads by focusing on value creation, not complexity
- Shift organizational mindset from "Is this going to replace me?" to "How can this represent and amplify what I do best?"

This presentation blends humor, real-world business insight, and cutting-edge tech strategies to help attendees not only embrace emerging technologies like AI, BLE, RFID, and IoT—but leverage them to scale human potential.

Orchestrating Multiple AI Models Using Pega Technology

Sairohith Thummarakoti

Industry Advisory Board Member,
Texas A&M University-Kingsville

**Wednesday, January 28,
2026**

Eastern: 1:00pm - 2:30pm

Pacific: 10:00am - 11:30am

Central European: 7:00pm -
8:30 pm

Presentation Language:
English

Target Continents: North
America, Europe, Australia,
Asia

Enterprises rarely rely on a single model. They blend predictive scores, NLP services, rules, and now generative and adaptive models—yet the hard part is making them work together, safely, and at scale. This talk shows how to use Pega to coordinate heterogeneous AI assets end-to-end: triggering models inside case workflows, brokering calls through APIs, and unifying outcomes in decision strategies. We'll walk through concrete patterns with Pega Customer Decision Hub and case management—combining a fraud model, a sentiment classifier, business rules, and a generative assistant—then governing them with versioning, guardrails, A/B testing, and explainability. We'll cover runtime orchestration (routing, fallbacks, timeouts, retries), policy controls (PII handling, approvals, audit trails), and monitoring (drift, bias, and performance) tied into MLOps. You'll see how agentic

behaviors fit: using goals and constraints to let agents select models, decompose tasks, and learn safely within Pega's governance.

About TekSummit 2026

The GAO (Global Advanced Operations) Group started TekSummit in the year 2021. It was an instant success. We ran it for 3 years, 2021, 2022, and 2023. We had hundreds of highly qualified speakers and thousands of attendees. We paused Tek Summit in 2024 and 2025 so that we could focus on our fast-growing businesses.

We have restarted it in 2026 and we plan to run it as a successful online event for many years to come. Your participation will be highly rewarding for you.

For a 2023, 2022, and 2021 TekSummit, please click

SPEAKERS

**FOR THE MONTH OF
JANUARY 2026**

From Fear to Function: Using AI to Unlock the True Potential of IoT and Automation

Greg Jameson

AI Architect for Business Growth,
Inc. 500 Entrepreneur

Biography

Greg Jameson is the AI Architect for Business Growth, an Inc. 500 award-winning entrepreneur, author of 20+ books, and one of the early pioneers in AI-powered ecommerce. He has developed hundreds of digital systems and AI tools for small businesses and Fortune 500 companies alike, helping leaders turn innovation into scalable results. Known for his skydiving metaphors and business storytelling, Greg speaks globally on AI, automation, and the future of work.

Presentation Title: From Fear to Function: Using AI to Unlock the True Potential of IoT and Automation

Abstract

In this thought-provoking and energizing session, AI expert and technology pioneer Greg Jameson delivers a bold message: the real challenge of AI and IoT adoption isn't the technology—it's the human response to it. Drawing on personal stories, industry shifts, and proven frameworks, Greg reframes fear of automation into a catalyst for innovation.

You'll discover how to:

- Use AI to translate IoT data into actionable business intelligence
- Multiply your team's effectiveness by combining human expertise with real-time automation
- Avoid the trap of chasing tech fads by focusing on value creation, not complexity
- Shift organizational mindset from "Is this going to replace me?" to "How can this represent and amplify what I do best?"

This presentation blends humor, real-world business insight, and cutting-edge tech strategies to help attendees not only embrace emerging technologies like AI, BLE, RFID, and IoT—but leverage them to scale human potential.

Orchestrating Multiple AI Models Using Pega Technology

**Sairohith
Thummarakoti**

Consultant Application
Engineer, HCA Healthcare

Biography

Mr. Sairohith Thummarakoti is a technology leader, innovator, and author with deep expertise in Pega, artificial intelligence, and cloud computing. With over a decade of experience, he designs scalable, intelligent systems that power automation, decision support, and digital modernization across healthcare and enterprise environments. His work centers on intelligent workflow design, multi-cloud optimization, and the integration of AI with cloud-native services.

He has led mission-critical initiatives using low-code platforms like Pega, advancing real-time analytics, automation, and infrastructure resilience in cloud ecosystems. Sairohith has authored six books with Taylor & Francis on AI, Pega, cloud architecture, and digital transformation, and holds patents in AI-based data optimization and cloud systems engineering. He has published more than 25 research papers in IEEE, Springer, and other Scopus-indexed venues and has reviewed over 200 manuscripts for leading journals and conferences, serving regularly as a session chair and technical committee member.

Presentation Title: Orchestrating Multiple AI Models Using Pega Technology

Abstract

Enterprises rarely rely on a single model. They blend predictive scores, NLP services, rules, and now generative and adaptive models—yet the hard part is making them work together, safely, and at scale. This talk shows how to use Pega to coordinate heterogeneous AI assets end-to-end: triggering models inside case workflows, brokering calls through APIs, and unifying outcomes in decision strategies. We'll walk through concrete patterns with Pega Customer Decision Hub and case management—combining a fraud model, a sentiment classifier, business rules, and a generative assistant—then governing them with versioning, guardrails, A/B testing, and explainability. We'll cover runtime orchestration (routing, fallbacks, timeouts, retries), policy controls (PII handling, approvals, audit trails), and monitoring (drift, bias, and performance) tied into MLOps. You'll see how agentic behaviors fit: using goals and constraints to let agents select models, decompose tasks, and learn safely within Pega's governance.
