

TekSummit & Aperture Ventures Summit

AGENDA For the Month of October 2026

**Jointly Hosted by GAO Tek Inc., GAO RFID Inc., GAO Research Inc. &
Aperture Venture Studio**

Ahad Sheik

Software Engineer at H-Bridge

October, 14, 2026

Eastern: 1:00pm – 2:30pm

Pacific: 10:00am – 11:30am

Central European: 7:00pm –
8:30 pm

Presentation Language:
English

Target Continents: North
America, Europe, Australia,
Asia

From AI Ideas to Real Products: Building Practical AI Applications

AI is moving very quickly from research and experimentation into products that people actually use. In this session, I would like to share a practical view of how AI applications can be developed from an initial idea into a working product. I'll cover areas such as Generative AI, AI-powered applications, full-stack integration, and building around real user problems. I'll also share some lessons from my own projects and my recent contract work with H-Bridge, a Tokyo-based startup focused on helping international students with career opportunities in Japan.

Hameeda Abdul Hameed Oyeku

Data Analyst

Tuesday, October 27, 2026

Eastern: 1:00pm - 2:30pm

Pacific: 10:00am - 11:30am

Central European: 7:00pm -
8:30 pm

AI + Data Analytics: Turning Business Data into Actionable Insights

Businesses generate large volumes of data but the challenge is turning that data into insights that can support better decisions. The combination of data analytics and Artificial Intelligence is changing how organizations collect, prepare, understand and use information.

This session will explore the practical relationship between AI and data analytics, focusing on how AI can support data preparation, pattern identification, reporting, visualization and decision-making. It will also examine why data quality remains critical when working with AI and how poor, incomplete or inaccurate data can affect the insights produced.

Using practical examples, the session will demonstrate how organizations can combine traditional analytics tools with AI to make business data more useful and actionable. It will also highlight the importance of human judgment, responsible data handling and protecting personal information when using AI-driven analytics.

The session is intended for professionals, business leaders and technology enthusiasts interested in understanding how AI and data analytics can be applied in practical business environments.

About TekSummit & Aperture Ventures Summit

The GAO (Global Advanced Operations) Group launched **TekSummit** in 2021, and it was an immediate success. The event was successfully held in 2021, 2022, and 2023, featuring hundreds of distinguished speakers and thousands of attendees from around the world. TekSummit was paused in 2024 and 2025 to allow the organization to focus on its rapidly growing businesses.

In 2026, **TekSummit** returns as a premier global online event and is jointly hosted with **Aperture Ventures Summit**. Together, the two platforms bring AI leaders, IoT experts, industrial innovators, researchers, technology professionals, startup founders, and corporate partners together to exchange knowledge, showcase innovative solutions, and explore real-world applications of AI, IoT, and AIoT technologies. Through expert-led sessions, technical discussions, and collaborative networking, participants will gain valuable insights into emerging technologies and their practical implementation across industries.

For information about the 2023, 2022, and 2021 TekSummit events, please visit:

Aperture Ventures Summit – Advancing AIoT Innovation and Industrial Transformation

Aperture Ventures Summit is a curated global summit series focused on advancing **Artificial Intelligence (AI), the Internet of Things (IoT), and Artificial Intelligence of Things (AIoT)** through real-world industrial and enterprise applications. The summit brings together AI leaders, IoT experts, industrial innovators, startup founders, researchers, corporate partners, and technology practitioners to exchange ideas, showcase AIoT systems, and foster meaningful collaboration.

Unlike traditional conferences, Aperture Ventures Summit operates as a continuous engagement platform featuring ongoing expert sessions, technical showcases, and collaborative discussions that highlight practical AIoT implementations across diverse industries.

Key Focus Areas

- AI for industrial and enterprise systems
 - IoT architectures, connectivity, and edge computing
 - AIoT system design and deployment
 - Computer vision, predictive analytics, and automation
 - Digital twins and intelligent operations
 - Industrial IoT security and interoperability
 - Smart manufacturing and connected infrastructure
 - Scalable AIoT solutions for real-world environments
 - Cross-industry AIoT applications and best practices
-
- 

Summit Experience

- Expert presentations from AI, IoT, and AIIoT thought leaders
- Real-world AIIoT system showcases and demonstrations
- Technical discussions on emerging technologies and industry trends
- Knowledge sharing, collaboration, and professional networking
- Exploration of practical AIIoT solutions for industrial and enterprise transformation

SPEAKERS

**FOR THE MONTH OF
October 2026**

From AI Ideas to Real Products: Building Practical AI Applications

Ahad Sheik

Software Engineer at H-Bridge

Biography

I'm a Computer Science graduate with a strong interest in Artificial Intelligence, Machine Learning, Generative AI, and software development. I have worked on AI and full-stack projects using Python, JavaScript, React.js, Node.js, SQL, MongoDB, and REST APIs. I recently completed a contract project with H-Bridge, a Tokyo-based startup, which gave me the opportunity to work on a real-world product focused on international students and career opportunities in Japan.

Presentation Title: From AI Ideas to Real Products: Building Practical AI Applications

Abstract

AI is moving very quickly from research and experimentation into products that people actually use. In this session, I would like to share a practical view of how AI applications can be developed from an initial idea into a working product. I'll cover

areas such as Generative AI, AI-powered applications, full-stack integration, and building around real user problems. I'll also share some lessons from my own projects and my recent contract work with H-Bridge, a Tokyo-based startup focused on helping international students with career opportunities in Japan.

AI + Data Analytics: Turning Business Data into Actionable Insights

Hameeda Abdul Hameed Oyeku
Data Analyst

Biography

Hameeda Abdul-Hameed Oyeku is a Data Analyst with practical experience in data preparation, validation, reporting and dashboard development. She works with tools including Microsoft Excel, Google Sheets and Power BI to transform data into clear reports and actionable insights.

Her experience includes working with operational data, developing performance dashboards, maintaining records and supporting data-driven decision-making. She also has a background in technical support and has participated in professional development programs focused on data analytics and visualization.

Hameeda is interested in the practical application of data and technology to help organizations improve processes, understand performance, and make better-informed decisions.

Presentation Title: AI + Data Analytics: Turning Business Data into Actionable Insights

Abstract

Businesses generate large volumes of data but the challenge is turning that data into insights that can support better decisions. The combination of data analytics and Artificial Intelligence is changing how organizations collect, prepare, understand and use information.

This session will explore the practical relationship between AI and data analytics, focusing on how AI can support data preparation, pattern identification, reporting, visualization and decision-making. It will also examine why data quality remains critical when working with AI and how poor, incomplete or inaccurate data can affect the insights produced.

Using practical examples, the session will demonstrate how organizations can combine traditional analytics tools with AI to make business data more useful and actionable. It will also highlight the importance of human judgment, responsible data handling and protecting personal information when using AI-driven analytics.

The session is intended for professionals, business leaders and technology enthusiasts interested in understanding how AI and data analytics can be applied in practical business environments.
